Contents

Preface / xiii

FLAIRS-2000 Organization / xv

FLAIRS-2000 Invited Talks / xx

Artificial Intelligence Applications

Autonomous Automobile Behavior through Context-Based Reasoning / 2
Fernando G. Gonzalez, Patrick Grejs, and Avelino J. Gonzalez, University of Central Florida, USA

Validation of Cryptographic Protocols by Efficient Automated Testing / 7
Sigrid Gürgens, German National Research Center for Information Technology, Germany; and René Peralta, Yale University, USA

Simultaneous Search in Connection Tableau Calculi by Means of Disjunctive Constraints / 13
Ortrun Ibens, Institut für Informatik, Technische Universität München, Germany

The SH-Verification Tool / 18
Peter Ochsenschläger, Jürgen Repp, and Roland Rieke, German National Research Center for Information Technology, Germany

Automated Partitioning of Tonal Music / 23
Bryan Pardo and William P. Birmingham, The University of Michigan, USA

Using Genetic Algorithms to Solve the Tactical Fixed Interval Scheduling Problem / 28
Xiaomin Zhong and Eugene Santos Jr., University of Connecticut, USA
Artificial Intelligence in Instructional Software
Reasoning from Data Rather than Theory / 34
Joseph E. Beck and Beverly P. Wolf, University of Massachusetts, USA

Actively Supporting Collaboration in Virtual Learning Environments / 40
Adrian Gordon and Lynne Hall, University of Northumbria at Newcastle, UK

What Is Wrong with this Equation? Error Detection and Feedback with Physics Equations / 45
C. W. Liew, Lafayette College, USA; Joel A. Shapiro and D. E. Smith, Rutgers University, USA

Supporting Intelligent Tutoring in CALL by Modeling the User’s Grammar / 50
Lisa N. Michaud and Kathleen F. McCoy, University of Delaware, USA

An Ontology as Domain Model in a Web-Based Educational System for Prolog / 55
Christoph Peylo, Wilfried Teiken, Claus Rollinger, and Helmar Gust, University of Osnabrück, Germany

Turn Planning in CIRCSIM-Tutor / 60
Feng-Jen Yang, Jung Hee Kim, Michael Glass, and Martha Evens, Illinois Institute of Technology, USA

Classification
Overriding the Experts: A Stacking Method for Combining Marginal Classifiers / 66
Mark D. Happel and Peter Bock, The George Washington University, USA

A Boosting-Based Prototype Weighting and Selection Scheme / 71
Richard Nock and Marc Sebban, Université des Antilles-Guyane, France

Neural Network Based Classification Using Blur Degradation and Affine Deformation Invariant Features / 76
Yani Zhang, Changyun Wen, and Ying Zhang, Nanyang Technological University, Singapore

Data Mining
Discovering Structural Patterns in Telecommunications Data / 82
Andi Baritchi, Diane J. Cook, and Lawrence B. Holder, University of Texas at Arlington, USA
Structural Knowledge Discovery Used to Analyze Earthquake Activity / 86  
Jesus A. Gonzalez, Lawrence B. Holder, and  
Diane J. Cook, University of Texas at Arlington, USA

Graph-Based Hierarchical Conceptual Clustering / 91  
Istvan Jonyer, Lawrence B. Holder, and  
Diane J. Cook, University of Texas at Arlington, USA

Genetic Algorithms
A Fuzzy Algorithm for the Efficient Utilization of Information in Decision Trees / 97  
Keeley A. Crockett and Zuhair Bandar, The Manchester Metropolitan University, UK;  
Akeel Al-Attar, Attar Software Limited, UK

Partitioning Sets with Genetic Algorithms / 102  
William A. Greene, University of New Orleans, USA

Cache Diversity in Genetic Algorithm Design / 107  
Eunice E. Santos, Lehigh University, USA;  
Eugene Santos Jr., University of Connecticut, USA

Information Retrieval
The Degradation of Knowledge Base Integrity / 113  
John Debenham, University of Technology, Australia

Fundamental Properties of the Core Matching Functions for Information Retrieval / 118  
D. W. Song and K. F. Wong, The Chinese University of Hong Kong, Hong Kong;  
P. D. Bruza, University of Queensland, Australia;  
C. H. Cheng, The Chinese University of Hong Kong, Hong Kong

Intelligent Agents
A Multiagent Architecture to Support Distance Learning Personalization on the Web / 124  
J. G. Boticario and E. Gaudioso, Universidad Nacional de Educación a Distancia, Spain

A Coherent Teamwork Model in a Dynamic Environment / 128  
M. Goyal and N. Parameswaran, The University of New South Wales, Australia

Resolving Conflicts Among Actions in Concurrent Behaviors: Learning to Coordinate / 133  
Henry Hexmoor, University of North Dakota, USA
Domain Semantics for Agent-Oriented Programming / 137
Roger Norton and Rebecca Thomas, Marist College, USA

Using Learning in a Control Agent / 144
James J. Pomykalski, James Madison University, USA

Use of Data Mining on Satellite Data Bases for Knowledge Extraction / 149
Lance Self, Air Force Research Laboratory, USA

**Knowledge Management**

Developing an Advanced Environment for Collaborative Computing / 154
Irma Becerra-Fernandez, Florida International University, USA; Helen Stewart, NASA Ames Research Center, USA; Martha Del Alto and Chris Knight, Caelum Research Corporation, USA

Defining and Monitoring Knowledge Integrity / 159
Fatma Mili, Krish Narayanan and Vamsi Atluri, Oakland University, USA

The Effect of Organizational Culture on the Implementation of Knowledge Management / 166
Francis D. Tuggle and Nancy Shaw, American University, USA

Active Case-Based Reasoning for Lessons Delivery System / 170
Rosina Weber, University of Wyoming and Naval Research Laboratory, USA; David W. Aha, Naval Research Laboratory, USA; L. Karl Branting, University of Wyoming, USA; J. Robert Lucas, USACOM Joint Warfighting Center, USA; Irma-Becerra Fernandez, Florida International University, USA

**Knowledge Representation**

HyperADD: An Incremental and Hybrid Approach for Knowledge Acquisition on Active Design Documents / 176
Sandro Coimbra Assis, Xerox do Brasil; Flávio Miguel Varejão, Universidade Federal do Espírito Santo, Brasil; Ana Cristina Garcia, Universidade Federal Fluminense, Brasil

Producing Modular Hybrid Rule Bases for Expert Systems / 181
Ioannis Hatzilygeroudis and Jim Prentzas, University of Patras and Computer Technology Institute, Greece

Generalizing Knowledge Representation Rules for Acquiring and Validating Uncertain Knowledge / 186
Gregory Johnson Jr. and Eugene Santos Jr., University of Connecticut, USA
Machine Learning
Real-Time Learning when Concepts Shift / 192
Jeffrey Coble and Diane J. Cook, The University of Texas at Arlington, USA

An Algebraic Approach to Inductive Learning / 197
Zdravko Markov, Central Connecticut State University, USA

Natural Language Processing
Using a Reactive Planner as the Basis for a Dialogue Agent / 203
Reva Freedman, University of Pittsburgh, USA

A Parallel Approach to Modeling Language Learning and Understanding in Young Children / 209
Charles Hannon and Diane J. Cook, University of Texas at Arlington, USA

Mining Textual Answers with Knowledge-Based Indicators / 214
Sanda M. Harabagiu and Marius Pasca, Southern Methodist University, USA

An Iterative Approach to Word Sense Disambiguation / 219
Rada Mihalcea and Dan I. Moldovan, Southern Methodist University, USA

Domain-Specific Knowledge Acquisition and Classification Using WordNet / 224
Dan Moldovan and Roxana Girju, Southern Methodist University, USA

Neural Networks
Fast Text Compression with Neural Networks / 230
Matthew V. Mahoney, Florida Institute of Technology, USA

Comparing Performance of Neural Networks Applied to a Simplified Recognition Problem / 235
Marcin Paprzycki, Rick Niess, Jason Thomas, Lenny Scardino, and William Douglas, University of Southern Mississippi, USA

Systematic Treatment of Failures Using Multilayer Perceptrons / 240
Fadzilah Siraj, Northern University of Malaysia, Malaysia; and Derek Partridge, University of Exeter, England

Spacecraft Autonomy
Case Studies of Autonomy / 246
Henry Hexmoor, University of North Dakota, USA
Comparison of Multiple Agent-Based Organizations for Satellite Constellations (TechSat21) / 250
Thomas Schetter and Mark Campbell, University of Washington, USA; Derek Surka, Princeton Satellite Systems, USA

Ground-Based Control of a Satellite Cluster / 260
Ross Wainwright, Air Force Research Laboratory, USA

Spatiotemporal Reasoning
Erosion Modeling in a Raster-Based GIS with Fuzzy Logic / 266
Hans W. Guesgen, Jochen Albrecht and Stefi Grundner, University of Auckland, New Zealand

Deriving Summaries Through an Identity-Based Approach / 271
Kathleen Hornsby, University of Maine, USA

Learning to Transfer Knowledge between Reference Systems / 276
Maria do Carmo Nicoletti and Jane Brennan, The University of New South Wales, Australia

Uncertain Reasoning
Top-Down Construction and Repetitive Structures Representation in Bayesian Networks / 282
Olav Bangsø, Aalborg University, Denmark; Pierre-Henri Wuillemin, Université Paris 6, France

Latin Hypercube Sampling in Bayesian Networks / 287
Jian Cheng and Marek J. Druzdzel, University of Pittsburgh, USA

Distributed Multi-Agent MSBN: Implementing Verification / 293
Hongyu Geng and Yang Xiang, University of Regina, Canada

Inferencing Bayesian Networks from Time Series Data Using Natural Selection / 298
Andrew J. Novobilski and Farhad A. Kamangar, University of Texas at Arlington, USA

Zooming in on Trade-Offs in Qualitative Probabilistic Networks / 303
Silja Renooij and Linda C. van der Gaag, Utrecht University, The Netherlands; Shaw Green, Queen Mary & Westfield College, University of London, UK; Simon Parsons, University of Liverpool, UK
Independence Semantics for BKBs / 308
Solomon Eyal Shimony, Ben Gurion University, Israel; Eugene Santos Jr., University of Connecticut, USA; Tzachi Rosen, Ben Gurion University, Israel

A Deterministic Algorithm for Solving Imprecise Decision Problems / 313
Håkan L. Younes, Carnegie Mellon University, USA; Love Ekenberg, Mid Sweden University, Sweden

Verification, Validation, and System Certification / 319
Formal Concepts of Learning Systems Validation in Use / 319
Volker Dötsch, Leipzig University, Germany; Gunter Grieser, Darmstadt University of Technology, Germany; Klaus P. Jantke, German Research Center for Artificial Intelligence Ltd., Germany; Steffen Lange, Leipzig University, Germany

TIC — A Toolkit for Validation in Formal Language Learning / 325
Volker Dötsch, Leipzig University, Germany; and Klaus P. Jantke, German Research Center for Artificial Intelligence Ltd., Germany

Towards Validation of Rule-Based Systems - The Loop is Closed / 331
Rainer Knauf and Ilka Philippow, Ilmenau Technical University, Germany; Avelino J. Gonzalez, University of Central Florida, USA; Klaus P. Jantke, German Research Center for Artificial Intelligence Ltd., Germany

The Use of Formal Methods for Trusted Digital Signature Devices / 336
Bruno Langenstein and Roland Vogt, German Research Center for Artificial Intelligence Ltd., Germany; Markus Ullmann, German Information Security Agency, Germany

A Case Study in the Mechanical Verification of Fault Tolerance / 341
Heiko Mantel, German Research Center for Artificial Intelligence Ltd., Germany; and Felix C. Gärtner, Darmstadt University of Technology, Germany

Verification of Cooperating Systems — An Approach Based on Formal Languages / 346
Peter Ochsenschläger, Jürgen Repp and Roland Rieke, German National Research Center for Information Technology, Germany

Uwe Petermann, University of Applied Sciences Leipzig, Germany

Modeling, Specification and Verification of an Emergency Closing System / 356
Werner Stephan, Georg Rock and Michael Brodski, German Research Center for Artificial Intelligence Ltd., Germany
Validation Method for Intelligent Systems / 361
Setuo Tsuruta, Hitachi Ltd., Japan; Takashi Onoyama,
Sen Kubota and Kazuko Oyanagi, Hitachi Software Engineering Co., Ltd., Japan

**Tutorial**

Formal Software Development in the
Verification Support Environment (VSE) / 367
Dieter Hutter, Georg Rock, Jorg H. Siekmann, Werner Stephan, and
Roland Vogt, German Research Center for Artificial Intelligence, Germany

Index / 377
