

Special Track on

AI Education

The FLAIRS Artificial Intelligence (AI) Education special track is devoted to methods of teaching AI, providing a forum where AI educators from diverse institutional settings can share resources, innovations, and insights to advance the quality of AI education worldwide.

Topics include, but are not limited to model assignments/experiences/syllabi for AI instruction; implementation of the computing curricula 2001 intelligent systems area; AI classroom techniques or innovations for undergraduate and/or graduate instruction; intelligent applications for instruction of AI and assessment of such applications; and incorporating AI research into AI courses.
