

Contents

Preface / ix

Shlomo Zilberstein, Jana Koehler, and Sven Koenig

ICAPS 2004 Organizing Committee / xi

ICAPS 2004 Program Committee / xii

ICAPS 2004 Sponsoring Organizations / xiv

Cognitive Robotics (Joint ICAPS/KR Session)

** Denotes a KR Conference Paper*

Extending the Knowledge-Based Approach to Planning with Incomplete Information and Sensing / 2

Ronald P. A. Petrick and Fahiem Bacchus

Knowledge of Other Agents and Communicative Actions in the Fluent Calculus* / 12

Yves Martin, Iman Narasamdya, and Michael Thielscher

Precondition Control and the Progression Algorithm* / 23

Alfredo Gabaldon

A Preference-Based Interpretation of Other Agents' Actions* / 33

Jérôme Lang

Knowledge in Planning (Joint ICAPS/KR Session)

** Denotes a KR Conference Paper*

From Hybrid Systems to Universal Plans via Domain Compilation / 44

Anthony Barrett

Planning Graphs and Knowledge Compilation* / 52

Héctor Geffner

Domain-Specific Preferences for Causal Reasoning and Planning* / 63

James P. Delgrande, Torsten Schaub, and Hans Tompits

Learning Probabilistic Relational Planning Rules / 73

Hanna M. Pasula, Luke S. Zettlemoyer, and Leslie Pack Kaelbling

Search in Planning and Scheduling (Joint ICAPS/KR Session)

** Denotes a KR Conference Paper*

An Improved Integer Local Search for Complex Scheduling Problems / 83

Weixiong Zhang and Xiaotao Zhang

Breadth-First Heuristic Search / 92

Rong Zhou and Eric A. Hansen

Phase Transitions in Classical Planning: An Experimental Study* / 101
Jussi Rintanen

A Polynomial Time Algorithm for Constructing k -Maintainable Policies / 111
Chitta Baral and Thomas Eiter

Search in Planning and Scheduling

Multiple Pattern Databases / 122
Robert C. Holte, Jack Newton, Ariel Felner, Ram Meshulam, and David Furcy

A Linear Search Strategy using Bounds / 132
Sharlee Climer and Weixiong Zhang

Optimal Rectangle Packing: New Results / 142
Richard E. Korf

A Lookahead Strategy for Heuristic Search Planning / 150
Vincent Vidal

Classical Planning

A Planning Heuristic Based on Causal Graph Analysis / 161
Malte Helmert

An Empirical Analysis of Some Heuristic Features for Local Search in LPG / 171
Alfonso Gerevini, Alessandro Saetti, and Ivan Serina

Using Component Abstraction for Automatic Generation of Macro-Actions / 181
Adi Botea, Martin Müller, and Jonathan Schaeffer

Learning Domain-Specific Control Knowledge from Random Walks / 191
Alan Fern, SungWook Yoon, and Robert Givan

Scheduling

Iterative Relaxations for Iterative Flattening in Cumulative Scheduling / 200
Laurent Michel and Pascal Van Hentenryck

Generating Robust Schedules through Temporal Flexibility / 209
Nicola Policella, Stephen F. Smith, Amedeo Cesta, and Angelo Oddi

The Value of Consensus in Online Stochastic Scheduling / 219
Russell Bent and Pascal Van Hentenryck

Trading Places: How to Schedule More in a
Multi-Resource Oversubscribed Scheduling Problem / 227
Laura Barbulescu, Adele E. Howe, L. Darrell Whitley, and Mark Roberts

Task Swapping for Schedule Improvement: A Broader Analysis / 235
Laurence A. Kramer and Stephen F. Smith

Price Prediction Strategies for Market-Based Scheduling / 244
Jeffrey K. MacKie-Mason, Anna Osepayshvili, Daniel M. Reeves, and Michael P. Wellman

Two-Job Shop Scheduling Problems with Availability Constraints / 253
Riad Aggoune

Incremental Maximum Flows for Fast Envelope Computation / 260
Nicola Muscettola

Model Checking and Plan Recognition

Planning with Extended Goals and Partial Observability / 270
Piergiorgio Bertoli and Marco Pistore

Guiding Planner Backjumping Using Verifier Traces / 279
Robert P. Goldman, Michael J. S. Pelican, and David J. Musliner

Probabilistic Plan Recognition in Multiagent Systems / 287
Suchi Saria and Sridhar Mahadevan

Statistical Goal Parameter Recognition / 297
Nate Blaylock and James Allen

Probabilistic Planning

Heuristic Refinements of Approximate Linear Programming for
Factored Continuous-State Markov Decision Processes / 306
Branislav Kveton and Milos Hauskrecht

Optimal Resource Allocation and Policy Formulation in
Loosely-Coupled Markov Decision Processes / 315
Dmitri A. Dolgov and Edmund H. Durfee

Policy Generation for Continuous-time Stochastic Domains with Concurrency / 325
Håkan L. S. Younes and Reid G. Simmons

Nondeterministic Planning

Fault Tolerant Planning: Toward Probabilistic Uncertainty Models in
Symbolic Non-Deterministic Planning / 335
Rune M. Jensen, Manuela M. Veloso, and Randal E. Bryant

Complexity of Planning with Partial Observability / 345
Jussi Rintanen

Conformant Planning via Heuristic Forward Search:
A New Approach / 355
Ronen I. Brafman and Jörg Hoffmann

Heuristic Guidance Measures for Conformant Planning / 365
Daniel Bryce and Subbarao Kambhampati

Planning and Scheduling Applications

Plays as Effective Multiagent Plans Enabling Opponent-Adaptive Play Selection / 376

Michael Bowling, Brett Browning, and Manuela Veloso

Distributed Feedback Control for Decision Making on Supply Chains / 384

*Christopher Kiekintveld, Michael P. Wellman, Satinder Singh, Joshua Estelle,
Yevgeniy Vorobeychik, Vishal Soni, and Matthew Rudary*

Choosing Objectives in Over-Subscription Planning / 393

David E. Smith

Decision-Theoretic Military Operations Planning / 402

Douglas Aberdeen, Sylvie Thiébaux, and Lin Zhang

Index / 413
