

Contents

Preface / ix

Mark Boddy, Maria Fox, and Sylvie Thiébaux

Organizing Committee / xii

Program Committee / xiii

Papers

Planning Robust Temporal Plans: A Comparison Between CBTP and TGA Approaches / 2

Yasmina Abdedaïm, Eugene Asarin, Matthieu Gallien, Felix Ingrand, Charles Lesire, and Mihaela Sighireanu

Concurrent Probabilistic Temporal Planning with Policy-Gradients / 10

Douglas Aberdeen and Olivier Buffet

Mixed Integer Linear Programming for Exact Finite-Horizon Planning in Decentralized Pomdps / 18

Raghav Aras, Alain Dutech, and François Charpillet

Exploiting Procedural Domain Control Knowledge in State-of-the-Art Planners / 26

Jorge A. Baier, Christian Fritz, and Sheila A. McIlraith

A Hybrid Linear Programming and Relaxed Plan Heuristic for
Partial Satisfaction Planning Problems / 34

J. Benton, Menkes van den Briel, and Subbarao Kambhampati

FF + FPG: Guiding a Policy-Gradient Planner / 42

Olivier Buffet and Douglas Aberdeen

Dynamic Control in Path-Planning with Real-Time Heuristic Search / 49

Vadim Bulitko, Yngvi Björnsson, Mitja Lustrek, Jonathan Schaeffer, and Sverrir Sigmundarson

An Innovative Product for Space Mission Planning: An A Posteriori Evaluation / 57

Amedeo Cesta, Gabriella Cortellessa, Simone Fratini, Angelo Oddi, and Nicola Policella

Online Planning for Resource Production in Real-Time Strategy Games / 65

Hei Chan, Alan Fern, Soumya Ray, Nick Wilson, and Chris Ventura

Act Local, Think Global: Width Notions for Tractable Planning / 73

Hubie Chen and Omer Giménez

Planning with Respect to an Existing Schedule of Events / 81

Andrew Coles, Maria Fox, Derek Long, and Amanda Smith

A New Local-Search Algorithm for Forward-Chaining Planning / 89

Andrew Coles, Maria Fox, and Amanda Smith

Online Identification of Useful Macro-Actions for Planning / 97

Andrew Coles, Maria Fox, and Amanda Smith

Evaluating Temporal Planning Domains / 105	<i>William Cushing, Daniel S. Weld, Subbarao Kambhampati, Mausam, and Kartik Talamadupula</i>
Prioritizing Bellman Backups without a Priority Queue / 113	<i>Peng Dai and Eric A. Hansen</i>
The Manpower Allocation Problem with Time Windows and Job-Teaming Constraints / 120	<i>Anders Dohn, Esben Kolind, and Jens Clausen</i>
External Memory Value Iteration / 128	<i>Stefan Edelkamp, Shahid Jabbar, and Blai Bonet</i>
Bounding the Resource Availability of Activities with Linear Resource Impact / 136	<i>Jeremy Frank and Paul H. Morris</i>
Monitoring Plan Optimality During Execution / 144	<i>Christian Fritz and Sheila A. McIlraith</i>
On the Hardness of Planning Problems with Simple Causal Graphs / 152	<i>Omer Giménez and Anders Jonsson</i>
Towards a Heuristic for Scheduling the James Webb Space Telescope / 160	<i>Mark E. Giuliano, Reiko Rager, and Nazma Ferdous</i>
Gradient-Based Relational Reinforcement Learning of Temporally Extended Policies / 168	<i>Charles Gretton</i>
Flexible Abstraction Heuristics for Optimal Sequential Planning / 176	<i>Malte Helmert, Patrik Haslum, and Jörg Hoffmann</i>
Constructing Conflict-Free Schedules in Space and Time / 184	<i>David W. Hildum and Stephen F. Smith</i>
Temporally-Expressive Planning as Constraint Satisfaction Problems / 192	<i>Yuxiao Hu</i>
Structural Patterns of Tractable Sequentially-Optimal Planning / 200	<i>Michael Katz and Carmel Domshlak</i>
Robust Local Search and Its Application to Generating Robust Schedules / 208	<i>Hoong Chuin Lau, Thomas Ou, and Fei Xiao</i>
Planning with Diversified Models for Fault-Tolerant Robots / 216	<i>Benjamin Lussier, Matthieu Gallien, Jérémie Guiochet, Félix Ingrand, Marc-Olivier Killijian, and David Powell</i>
Learning to Plan Using Harmonic Analysis of Diffusion Models / 224	<i>Sridhar Mahadevan, Sarah Osentoski, Jeff Johns, Kimberly Ferguson, and Chang Wang</i>
Angelic Semantics for High-Level Actions / 232	<i>Bhaskara Marthi, Stuart Russell, and Jason Wolfe</i>
Cost-Sharing Approximations for h^+ / 240	<i>Vitaly Mirkis and Carmel Domshlak</i>
Transformational Planning for Everyday Activity / 248	<i>Armin Müller, Alexandra Kirsch, and Michael Beetz</i>

Learning Macro-Actions for Arbitrary Planners and Domains / 256	<i>M. A. Hakim Newton, John Levine, Maria Fox, and Derek Long</i>
From Conformant into Classical Planning: Efficient Translations that May Be Complete Too / 264	<i>Héctor Palacios and Héctor Geffner</i>
Managing Personal Tasks with Time Constraints and Preferences / 272	<i>Ioannis Refanidis</i>
Complexity of Concurrent Temporal Planning / 280	<i>Jussi Rintanen</i>
Approximate Solution Techniques for Factored First-Order MDPs / 288	<i>Scott Sanner and Craig Boutilier</i>
A Fast Incremental Algorithm for Maintaining Dispatchability of Partially Controllable Plans / 296	<i>Julie Shah, John Stedl, Brian Williams, and Paul Robertson</i>
Generating Exponentially Smaller POMDP Models Using Conditionally Irrelevant Variable Abstraction / 304	<i>Trey Smith, David R. Thompson, and David S. Wettergreen</i>
Using Decision Procedures Efficiently for Optimization / 312	<i>Matthew Streeter and Stephen F. Smith</i>
Using Adaptive Priority Weighting to Direct Search in Probabilistic Scheduling / 320	<i>Andrew M. Sutton, Adele E. Howe, and L. Darrell Whitley</i>
Context-Aware Logistic Routing and Scheduling / 328	<i>Adriaan W. ter Mors, Jonne Zutt, and Cees Witteveen</i>
itSIMPLE _{2,0} : An Integrated Tool for Designing Planning Domains / 336	<i>Tiago Stegun Vaquero, Victor Romero, Flavio Tonidandel, and José Reinaldo Silva</i>
Discovering Relational Domain Features for Probabilistic Planning / 344	<i>Jia-Hong Wu and Robert Givan</i>
FF-Replan: A Baseline for Probabilistic Planning / 352	<i>Sungwook Yoon, Alan Fern, and Robert Givan</i>
Index / 361
