Etiquette for Human-Computer Work

Papers from the 2002 AAAI Fall Symposium

Christopher Miller, Chair

November 15–17, North Falmouth, Massachusetts
Technical Report FS-02-02

AAAI Press
Menlo Park, California
Organizing Committee

Christopher Miller (Chair), Smart Information Flow Technologies
Timothy Bickmore, MIT Media Lab
Clifford Nass, Stanford University
Raja Parasuraman, The Catholic University of America
Contents

Definitions and Dimensions of Etiquette / 1
Christopher A. Miller

Trust and Communication in Complex, Safety Critical Systems / 8
Raja Parasuraman

When Etiquette Really Matters: Relational Agents and Behavior Change / 9
Timothy Bickmore

Understanding and Decreasing Aversive Behavior in Online Social Contexts / 11
John P. Davis

Impact of Roles on Participation and Task Performance / 14
Susan Hahn, Michael Lewis, and Terri L. Lenox

Trust in Computer Technology and the Implications for Design and Evaluation / 20
John D. Lee and Katrina A. See

Making Pedagogical Agents More Socially Intelligent / 27
Lewis Johnson

Specifying Organizational Policies and Individual Preferences for Human-Software Interaction / 32
Debra Schreckenghost, Cheryl Martin, and Carroll Thronesbery

Polite Computing: Software that Respects the User / 40
Brian Whitworth

Caroline Hayes, Amit Pande, and Chris Miller

Collective Mistrust of Alarms / 52
James P. Bliss, Susan Sidone, and Holly Mason

Etiquette within and between Large Human-Robot Teams / 57
Christopher L. Johnson

Computer Teammates: Should They Read Your Mind? / 61
Mark W. Scerbo

A Framework for Designing Etiquette for Educational Technology / 68
Punyashloke Mishra and Kathryn Hershey

Good Computational Manners: Mixed-Initiative Dialog in Conversational Agents / 71
Max Louwarse, Art Graesser, Andrew Olney, and the Tutoring Research Group

Etiquette and Efficacy in Animated Pedagogical Agents: The Role of Stereotypes / 77
Kristen N. Moreno, Natalie K. Person, Amy B. Adcock, Richard N. Van Eck, G. Tanner Jackson, and Johanna C. Marineau
Personal Data for Personal Use: Case Studies in User Modeling for Context-Aware Computing / 81
Andrea Lockerd and Ernesto Arroyo

Experiences with Civility and the Role of a Social Contract in Virtual Communities: A Communitas Model / 85
Barry Kort, Rob Reilly, and Nancy Williams

Traps, Pitfalls, Swindles, Lies, Doubts and Suspicions in Human-Computer Interaction: A Counter-Case for the Study of Good Etiquette / 87
Jack L. Edwards, Greg Scott, Sharon McFadden, and Keith C. Hendy
