Contents

Designing a Robot Cognitive Architecture with Concurrency and Active Perception / 1
D. Paul Benjamin, Deryle Lonsdale, and Damian Lyons

Social Learning in Humans, Animals and Agents / 9
Daphna Buchsbaum, Bruce Blumberg, and Cynthia Breazeal

Using Models of Cognition in HRI Evaluation and Design / 17
Michael A. Goodrich

Robots that Work in Collaboration with People / 25
Guy Hoffman and Cynthia Breazeal

Making Decisions about Motion / 31
Jamie Lennon and Ella Atkins

Multilevel Emotion Modeling for Autonomous Agents / 39
Andrea H. Marpaung and Christine L. Lisetti

A Cognitive Robotics Approach to Identifying Perceptually Indistinguishable Objects / 47
John F. Santore and Stuart C. Shapiro

Humanoids, from Interfaces to Intelligence. Really?
A Philosophical Statement on Retrograding or Scientists Caught Back-Peddling / 55
Colin T. Schmidt

Facilitating Interaction among Humans and Immobots about the Job / 61
Debra Schreckenghost and Cheryl Martin

A Biologically Inspired Adaptive Working Memory for Robots / 68
Marjorie Skubic, David Noelle, Mitch Wilkes, Kazuhiko Kawamura, and James M. Keller

From Embodiments Back to their Minds: An Affective Abstraction / 76
Zippora Arzi-Gonzarowski

Pete Bonasso and Mike Freed

Semantic SLAM for Collaborative Cognitive Workspaces / 85
Frank Dellaert and David Bruemmer

Peer-to-Peer Human-Robot Interaction for Space Exploration / 87
Terrence Fong and Illah Nourbakhsh

Behavior Implicit Communication for Human-Robot Interaction / 91
Francesca Giardini and Cristiano Castelfranchi

A Framework for Understanding Verbal Route Instructions / 97
Matt MacMahon
Which Came First: The User or the Interface? Keeping the Human in the Loop from Design Phase to Finished Product / 103
Dennis Perzanowski

Robot Learning with Predictions of Operator Intent / 107
Michael T. Rosenstein, Andrew H. Fagg, and Roderic A. Grupen

Grounding Language in the World: Signs, Schemas, and Meaning / 109
Deb Roy

Cognitive Primitives for Mobile Robots / 110
Ethan J. Tira-Thompson, Neil S. Halelamien, Jordan J. Wales, and David S. Touretzky

A Viewpoint on Embodied Synthetic Agency / 112
Ovi Chris Rouly
