

*This Symposium
Is Dedicated
to John McCarthy
in celebration of
his 80th birthday*

Contents

Preface / vii

Eyal Amir, Vladimir Lifschitz, and Rob Miller

On the Occasion of John McCarthy's 80th Birthday / ix

Toward Domain-Neutral Human-Level Metacognition / 1

*Michael L. Anderson, Matt Schmill, Tim Oates, Don Perlis,
Darsana Josyula, Dean Wright, and Shomir Wilson,*

On Domain-Independent Heuristics for
Planning with Qualitative Preferences / 7

Jorge A. Baier and Sheila A. McIlraith

Learning Action Descriptions with A-Prolog:
Action Language C / 13

Marcello Balduccini

On Default Representation of Defeasible Inference
and Specificity / 19

Alexander Bochman

Learning a Plan in the Limit / 25

Patrick Caldon and Eric Martin

Defeasible Laws, Parallel Actions, and Reasoning about Resources / 35

Sandeep Chintabathina, Michael Gelfond, and Richard Watson

Expressing Preferences Declaratively in Logic-based Agent Languages / 41

Stefania Costantini, Arianna Tocchio, and Pierangelo Dell'Acqua

Resolving Non-Determinism in Programs for Complex
Task Planning with Search Control / 47

Alfredo Gabaldon

A Logical Theory of Coordination and Joint Ability / 53

Hojjat Ghaderi, Hector Levesque, and Yves Lespérance

Context Mereology / 59

Patrick Hayes

An Explicit Model of Belief Change for Cryptographic
Protocol Verification / 65

Aaron Hunter and James P. Delgrande

A Generic Framework for Approximate Simulation in Commonsense
Reasoning Systems / 71

Benjamin Johnston and Mary-Anne Williams

Knowledge Acquisition by an Intelligent Acting Agent / 77	
	<i>Michael Kandefer and Stuart C. Shapiro</i>
Variables in Action Descriptions: Merging C+ with ADL / 83	
	<i>Vladimir Lifschitz and Wanwan Ren</i>
Finitely-Verifiable Classes of Sentences / 89	
	<i>Fangzhen Lin</i>
Deductive Planning with Temporal Constraints / 95	
	<i>Martin Magnusson and Patrick Doherty</i>
Grounding a Geographic Ontology on Geographic Data / 101	
	<i>David Mullenby</i>
On the Learnability of Causal Domains: Inferring Temporal Reality from Appearances / 107	
	<i>Loizos Michael</i>
Towards Realistic Autocognitive Inference / 114	
	<i>Fabrizio Morbini and Lenhart Schubert</i>
Grounding Stanislavskian Scene Analysis in a Formal Theory of Action / 119	
	<i>Leora Morgenstern</i>
Discrete Event Calculus with Branching Time / 126	
	<i>Erik T. Mueller</i>
Learning from Reading Syntactically Complex Biology Texts / 132	
	<i>Rutu Mulkar, Jerry R. Hobbs and Eduard Hovy</i>
Using Common Sense for Decision Making in an Adventure Game / 138	
	<i>Deepak Ramachandran</i>
Holes, Knots and Shapes: A Spatial Ontology of a Puzzle / 144	
	<i>Paulo Santos and Pedro Cabalar</i>
Towards a Theory of AI Completeness / 150	
	<i>Dafna Shahaf and Eyal Amir</i>
Conditionals and Action Logics / 156	
	<i>Richmond H. Thomason</i>
A Coherent and Paraconsistent Variant of the Default Logic / 162	
	<i>Anbu Yue and Zuoquan Lin</i>
