Call for Participation

Seventh Bar-Ilan International Symposium on the Foundations of Artificial Intelligence (BISFAI-2001)

June 25-27, 2001 Ramat-Gan, Israel ■ *Honoring Yaacov Choueka*

The seventh biennial Bar-Ilan International Symposium on the Foundations of Artificial Intelligence, will be held on June 25-27, 2001 in Ramat Gan, Israel. The meeting will honor the research and accomplishments of Yaacov Choueka and will therefore place special emphasis on natural language processing and computational linguistics, in addition to the usual topics of the symposium.

Invited Speakers:

■ Yaacov Choueka ■ Jieh Hsiang ■ Daphne Koller ■ Richard Korf ■ Doug Lenat ■ Moshe Vardi

The BISFAI-01 program, schedule and registration information will be available at the BISFAI website: www.cs.biu.ac.il/~bisfai, along with abstracts of invited and accepted papers and pointers to online versions. For further information or requests, contact: bisfai@cs.biu.ac.il.

BISFAI Cosponsors:

■ The Gelbart Institute for Mathematical Sciences at Bar-Ilan University ■ The Edmond Benjamin de Rothschild Institute for Interdisciplinary Computer Science at Haifa University ■ The American Association for Artificial Intelligence (AAAI) ■ Bar-Ilan University Dept. of Mathematics and the Faculty of Exact Sciences ■ Bar-Ilan University Office of the Rector and the Research Authority ■ NDS Israel Ltd.

Symposium Committee:

Symposium Cochairs: Martin C. Golumbic (golumbic@cs.biu.ac.il)

Sarit Kraus (sarit@cs.biu.ac.il)

Program Chair: Nachum Dershowitz (nachumd@tau.ac.il)

Organization Chair: Ariel Frank (ariel@cs.biu.ac.il)

JULY 7-10

International Conference on Enterprise Information Systems (ICEIS 2001). Setubal, Portugal

■ Sponsor:

UNIVERSITY OF OKLAHOMA

Faculty Positions for Intelligent Aerospace Systems Program

The College of Engineering at the University of Oklahoma invites applications for 3 to 5 new faculty positions at all levels in the area of Intelligent Systems. The initial thrust of the program will be Intelligent Aerospace Systems. Preference will be given to applicants who have experience and/or training in this field, with research interests in one or more of these areas: intelligent design, intelligent control, and autonomous systems.

Faculty in this new interdisciplinary program will have joint appointments in two schools within the College. Applicants should indicate a primary and secondary school from the following: Aerospace and Mechanical Engineering (AME), Computer Science (CS), Electrical and Computer Engineering (ECE), and Industrial Engineering (IE). The primary school should represent the discipline most closely aligned with the applicant's research interests and background. The secondary school should reflect the breadth of the applicant's knowledge.

This innovative Intelligent Systems program will aid initially in modernizing the scope and content of the current Aerospace Engineering program, which has an excellent and long-standing legacy and reputation. Thus, the successful candidate is expected to be an integral part of this effort while being capable of performing well in interdisciplinary teams. Future growth plans for the Intelligent Systems program include broadening its scope to include thrusts in other disciplines within the College of Engineering.

The mission of the College of Engineering is to produce graduates most sought after by industry and investors. The College strategic plan includes development of multi-disciplinary partnerships, innovative learning technologies, and a balanced mix of publicly and privately funded graduate research. The four schools partnering in the Intelligent Systems program all have comprehensive and recognized programs. Further details for each school can be found at these web sites: www.ame.ou.edu, www.cs.ou.edu, www.ece.ou.edu, and www.ie.ou.edu.

Candidates are expected to hold a Ph.D. in a relevant area. Experience with industry is desirable. Applicants are requested to submit a letter of intent along with a curriculum vitae and the names and addresses of three references to the address below. The first screening will begin on January 1, 2001, and the search will continue until the positions are filled.

Dr. William Sutton, Director

School of Aerospace and Mechanical Engineering, The University of Oklahoma, 865 Asp Avenue, Room 212, Norman, OK 73019-1052

Phone: (405) 325-5011 Fax: (405) 325-1088 e-mail: sutton@ou.edu

The University of Oklahoma is a comprehensive university located in Norman, Oklahoma. Norman has a population of around 100,000 and has one of the best public school systems in the nation. The University and the Norman area offer a wide range of cultural and recreational activities. Norman is located near Oklahoma City, which has a metropolitan population of around 1 million. The University of Oklahoma's beautiful 2,000 acre Norman Campus serves over 21,000 students from all 50 states and 111 countries.

The University of Oklahoma is an Equal Opportunity/Affirmative Action Employer.

Women and minorities are encouraged to apply. OU has a policy of being responsive to the needs of dual-career couples.

DIRECTOR OF BIOINFORMATICS

A well-funded, San Francisco Bay Area-based biotechnology company is looking for a Director of Bioinformatics to head up its bioinformatics unit. This challenging role will involve designing the architecture of a multi-dimensional database, the integration of complex data arising from rich, multi-dimensional content in a relational database, as well as creating data mining tools suitable for the mining of mathematical patterns which yield biological insight. Requires Ph.D. (or equivalent) in Mathematics, and / or Computer Science with advanced biological training (genetics, physiology and molecular immunology). Must have proven ability to write algorithms for data mining and bioinformatics analysis, design database architecture, and manage complex database implementation.
