Videos Needed about AI Research Efforts in Academic and Industrial Laboratories Worldwide

At AAAI-91, AAAI conducted an experiment, running short (5- to 15-minute) videotapes of research projects and lectures, in the conference registration area. Conference attendees were pleased with the experiment, so AAAI would like to expand the number of tapes it has available for showing at AAAI-92 in San Jose, California (12–17 July). The conference is an excellent opportunity for your lab’s research efforts to be shown to a large portion of the AI community.

AAAI is looking for short tapes that can be run in parallel on several screens. Please do not send tapes of a particular project or lecture but, rather, tapes that present broad descriptions of different programs, projects, and systems that are used within your lab. Submit the tapes by 1 March 1992 to

AAAI-92 Videos
Attn: Richard Skalsky
445 Burgess Drive
Menlo Park, CA 94025

Label the tape and the tape case with the following information: the title of the tape; full names, postal addresses, telephone numbers, and e-mail addresses of all authors; tape format (for example, VHS, 3/4-inch U-matic, NTSC, PAL, SECAM); and its length in minutes. Also please include an abstract that briefly describes the lab’s research projects and the content of the tape and written permission from the author or the sponsoring institution allowing the tape to be copied for purposes of review.

All tapes will be reviewed. Only those tapes judged to be inappropriate will be returned. Please do not send master copies of your tapes. For questions or additional information about this program, contact Richard A. Skalsky at skalsky@aaai.org or (415) 328-3123.

Scholarship Travel Program Continued

AAAI announces the continuation of its scholarship travel program for students to attend the National Conference on Artificial Intelligence in San Jose, California, July 12–17, 1992. The program provides partial travel support for students who are (a) full-time undergraduate or graduate students at US colleges and universities, (b) members of AAAI; and (c) apply for a travel scholarship when submitting a paper to the conference. In addition, repeat scholarship applicants must have fulfilled the volunteer and reporting requirements for previous awards. This year, the program will be extended with limited funds to support students who submit a letter of recommendation from a faculty supervisor in lieu of a paper, student authors from foreign institutions, and foreign scholars.

Scholarship recipients will be required to participate in the student volunteer program to support AAAI staff in San Jose. Volunteers will be asked to work for a brief amount of time during the conference. The volunteer program is an essential part of the conference, and student participation is a valuable contribution. After the conference, an expense report will be required to account for the funds awarded.

For further information, or to obtain an application, please contact AAAI at scholarships@aaai.org. The scholarship application deadline is April 3, 1992.

Student Volunteers Needed for AAAI-92

Undergraduate or graduate students enrolled in a full-time degree program at any college or university are eligible to serve as student volunteers during AAAI-92, to be held at the San Jose Convention Center in San Jose, California, July 12–17, 1991. In exchange for assisting AAAI staff dur-
Innovative Applications of Artificial Intelligence
edited by Herbert Schorr and Alain Rappaport

All of the contributions in this book have a practical slant, showing how AI has been successfully applied to a wide spectrum of domains and tasks. They provide an excellent sampling of the types of applications coming on line. Systems architectures and development strategies are addressed along with tactical issues, payback data, and real benefits.

Featuring applications in:
- Aerospace
- Banking and Finance
- Media
- Music
- Military
- Operations Management
- Personnel Management
- Retail Packaging

References, index, 300 pp.

Innovative Applications of Artificial Intelligence 3
edited by Reid Smith and Carlisle Scott

Innovative Applications of Artificial Intelligence 2
edited by Alain Rappaport and Reid Smith

Books in the Innovative Applications of Artificial Intelligence (IAAI) series report on the nature and range of real-world problems that AI technology can address successfully today. They provide an excellent sampling of the types of applications coming on line. Systems architectures and development strategies are addressed along with tactical issues, payback data, and real benefits.

Machine Learning Subscriptions Available to AAAI Members at Reduced Rate
All AAAI individual members can now take advantage of a special reduced rate on the journal, Machine Learning. You can receive all six issues of Machine Learning (1991, Volumes 6 and 7) for only $78.00 This offer is being made exclusively to individual members of AAAI, and represents a savings of over 15% off the regular subscription rate of $95.00. In 1992 Machine Learning is expanding from 6 to 8 issues. The AAAI special rate for 1992 is $88.00

To order, call (617) 871-6600, and have your credit card and AAAI membership number ready. You may also fax or email your order (include your credit card number, telephone number, and AAAI membership number).

Fax: (617) 871-6528.
