

## Call for Proposals

# Tutorial Forum at the Twenty-Fourth AAAI Conference on Artificial Intelligence

July 11–15, 2010  
Atlanta, Georgia USA

Sponsored by the Association for the Advancement of Artificial Intelligence

The AAAI-10 Program Committee invites proposals for the Tutorial Forum of the Twenty-Fourth AAAI Conference on Artificial Intelligence (AAAI-10). The Tutorial Forum will be held July 11–12, 2010 in Atlanta. Anyone interested in presenting a tutorial at AAAI-10 should submit a proposal to the 2010 Tutorial Forum Cochairs listed below.

### What Is the Tutorial Forum?

The Tutorial Forum provides an opportunity for junior and senior researchers to spend two days each year freely exploring exciting advances in disciplines outside their normal focus. We believe this type of forum is essential for the cross fertilization, cohesiveness, and vitality of the AI field. We all have a lot to learn from each other; the Tutorial Forum promotes the continuing education of each member of the AAAI.

### Topics

AAAI is interested in proposals for advanced tutorials at the leading edge of AI. We are particularly interested in tutorials that offer two types of knowledge. The first type provides in-depth background tools to help educate researchers and students for the purpose of conducting AI research; examples of this type of tutorials from AAAI-08 include "General Game Playing," "Graphical Models for Multiagent Decision-Making," and "Satisfied by Message Passing: Probabilistic Techniques for Combinatorial Problems." A second type of tutorial provides a broad overview for an AI area that potentially crosses boundaries with an interesting application area; examples of this type of tutorial from AAAI-08 include "Social Network Mining: A Tutorial on Inference and Learning with Social Network Data" and "Machine Learning for Biomedical Applications."

Our goal is to present a diverse program that includes core areas of AI, new techniques from allied disciplines that can inform research within AI, and conversely emerging applications of AI techniques to new areas. Previous years' tutorial programs provide an indication of the scope and vari-

ety of possible topics. The list is not exclusive; indeed, we are expressly interested in topics that we would not have imagined to mention. Finally, note that we very much welcome proposals for educational approaches that go beyond the traditional format of four-hour tutorials, exploiting the flexibility that the one-fee program offers.

### Submission Requirements

We need two kinds of information in the proposals: information that will be used for selecting proposals and information that will appear in the tutorial description brochure. The proposal should provide sufficient information to evaluate the quality of the technical content being taught, the quality of the educational material being used, and the speakers' skill at presenting this material.

Each proposal should include at least the following:

*Goal of the tutorial:* Who is the target audience? What will the audience walk away with? What makes the topic innovative?

*Content:* Detailed outline and list of additional materials, augmented with samples, such as past tutorial slides and survey articles, whenever possible. Be as complete as possible.

*Tutorial description:* A short paragraph summarizing the tutorial outline, and the intended duration of the symposium (default is four hours).

*Prerequisite knowledge:* What knowledge is assumed of the target audience.

Please also submit the following information about the team of presenters:

- Name
- Mailing address
- Telephone number

- E-mail address
- Background in the tutorial area, including a list of publications and/or presentations
- Any available examples of work in the area (ideally, a published tutorial-level article or presentation materials on the subject)
- Evidence of teaching experience (courses taught or references)
- Evidence of scholarship in AI or computer science.

### Submission Deadline

Proposals must be received by November 13, 2009. Decisions about the tutorial program will be made by December 7, 2009. Speakers should be prepared to submit their tutorial descriptions and bios by January 8, 2010, and to post completed course materials on their websites by June 4, 2010. Please e-mail proposal material to Russell Greiner and Thomas Lukasiewicz at the following addresses.

### Important Dates

November 13, 2009: Proposals Due

December 7, 2009: Tutorial Program Finalized

January 8, 2010: Tutorial Descriptions and Speaker Biographies Due

June 4, 2010: Course Materials Must be Posted on Speaker's Website

July 11–15, 2010: Tutorials Presented
